FIELD LOGBOOK

CLEARANCE · GRADE 4

SUMMER 2026 · 8 MISSIONS

Summer Expedition

A field logbook of math missions. Clear one objective at a time. Stamp it. Move on.

COMMANDING OFFICER

Charles

GRADE

4

EXPEDITION

BRIEFING

READ THIS FIRST, COMMANDER

How the Expedition Works

You’re not studying. You’re running missions.

1. **One objective set a day.** About 15 minutes. You don’t have to clear a whole mission at once — a little every day moves you across the map.

2. **There are no wrong landings.** Cross it out, try again. Re-trying a problem is exactly what real commanders do. Mistakes don’t cost you anything here.

3. **Clear it, then stamp it.** When you finish a page, mark it cleared in the corner and color in that mission on the next page. Watching the map fill up is the whole point.

4. **Bonus Objectives are optional.** The dark “Brain Bender” boxes are extra credit for when you’re feeling sharp. Skip them on a tired day — they don’t count against you.

MISSION CONTROL NOTE

Every mission is built at your grade level. It’s meant to feel doable, not heavy. If a page ever feels like too much, that’s a signal to stop for the day — not a sign you’re behind. You set the pace.

THE MAP

YOUR SUMMER AT A GLANCE

The Mission Map

Eight missions, one summer. **Color in a badge** every time you clear a mission — this is your scoreboard.

SYSTEMS CHECK · FLUENCY

Warm-Up Drills

CLEARED?

Quick reps to warm the engines. **Add or subtract** each one, then knock out the fact checks. No timer — just steady.

1 7,905 - 3,300 = ______

2 9,097 - 4,272 = ______

3 8,798 - 5,036 = ______

4 9,364 - 8,373 = ______

5 2,386 + 6,800 = ______

6 3,799 + 1,586 = ______

Fact checks. Keep your multiplication and division sharp.

7 9 × 6 = ______

8 3 × 6 = ______

9 5 × 4 = ______

10 28 ÷ 7 = ______

11 24 ÷ 6 = ______

12 40 ÷ 8 = ______

MISSION 01 · B

OBJECTIVE · CONCEPT

Place Value & Rounding

CLEARED? ▢

MISSION BRIEF

Every digit has a **place**, and its place tells you its **value**. In **27,418**, the **7** sits in the thousands place — so its value is **7,000**, not just 7.

To **round**, look at the digit just to the **right** of the place you want. 5 or more rounds up; 4 or less stays put. Rounding **4,827** to the nearest hundred → look at the 2 → **4,800**.

What is the **value** of the digit **7** in **73,482**?

Value: ____________

Write this number in standard form: **60,000 + 3,000 + 200 + 50 + 4**

Standard form: ____________

Round **4,827** to the nearest **hundred**, then the nearest **thousand**.

Hundred: __________ Thousand: __________

Round **38,461** to the nearest **thousand**, then the nearest **ten thousand**.

Thousand: __________ Ten thousand: __________

Write **<**, **>**, or **=**: **12,405** _____ **12,450**

Put these in order from **least to greatest**: **9,870** **9,087** **9,807** **9,078**

MISSION 01 · C

FIELD OBJECTIVES · WORD PROBLEMS

Out on the Trail

CLEARED? ▢

Real missions, real numbers. **Show your work** in the box — how you got there matters more than the answer.

The expedition packs **1,250** ration bars on Monday and **1,875** more on Tuesday. The crew eats **940** on the trail. How many ration bars are left?

Answer: ______________

Rover A logs **3,408** meters. Rover B travels **1,756** meters **more** than Rover A. How far did Rover B travel?

Answer: ______________

A satellite can store **8,000** photos and has taken **5,640**. **About** how many can it still take? Round to the nearest **hundred**.

Answer: ______________

◆ BONUS OBJECTIVE · BRAIN BENDER

The Supply Drop

Mission Control needs to split **4,824** supply crates **evenly** among **6** landing zones. How many crates go to each zone? Then, if one zone hands **150** crates to a neighbor, how many does the neighbor end up with?

Optional — skip it on a tired day. Clearing it earns the ◆ Sharp Shooter mark.

DEBRIEF

MISSION 01 · ANSWER KEY

Mission Debrief

For Mission Control (the grown-up) — or for Charles to self-check once a page is done.

A · WARM-UP DRILLS

1. **4,605**
2. **4,825**
3. **3,762**
4. **991**
5. **9,186**
6. **5,385**

Facts: 7) 54   8) 18   9) 20   10) 4   11) 4   12) 5

B · PLACE VALUE & ROUNDING

1. 70,000
2. 63,254
3. 4,800 ; 5,000
4. 38,000 ; 40,000
5. 12,405 < 12,450
6. 9,078 · 9,087 · 9,807 · 9,870

C · OUT ON THE TRAIL

1. 1,250 + 1,875 = 3,125; 3,125 – 940 = **2,185 bars**
2. 3,408 + 1,756 = **5,164 meters**
3. 8,000 – 5,640 = 2,360 → **2,400 photos**

◆ BRAIN BENDER · THE SUPPLY DROP

- 4,824 ÷ 6 = **804 crates** per zone
- 804 + 150 = **954 crates** for the neighbor

Reaches toward 5th-grade multi-step reasoning — no pressure if skipped.

Measuring the Mission

CLEARED? ▢

Real missions, real numbers. **Show your work** in the box — how you got there matters more than the answer.

A trail is **8 km** long. The crew hikes **3 km 600 m** before lunch. How many **meters** are left to go?

Answer: ____________

Each canister holds **2 L** of water. The crew fills **5** canisters. How many **mL** of water is that in total?

Answer: ____________

A supply crate has a mass of **3 kg**. There are **4** crates. What is the total mass in **grams**?

Answer: ____________

◆ BONUS OBJECTIVE · BRAIN BENDER

The Fuel Gauge

The rover's tank holds **6 L** of fuel. It burns **750 mL** every hour. After **7 hours**, how many **mL** of fuel are left?

Optional — skip it on a tired day. Clearing it earns the ◆ Sharp Shooter mark.

DEBRIEF

MISSION 02 · ANSWER KEY

Mission Debrief

For Mission Control (the grown-up) — or for Charles to self-check once a page is done.

A · WARM-UP DRILLS

1. **6,418**
2. **3,559**
3. **7,638**
4. **4,349**
5. **4,719**
6. **1,031**

Facts: 7) 36 8) 63 9) 35 10) 4 11) 7 12) 5

B · MEASUREMENT & UNITS

1. 3,000 m
2. 500 cm
3. 4,000 g
4. 2,000 mL
5. 7,250 m
6. 6 L

C · MEASURING THE MISSION

1. 8,000 – 3,600 = **4,400 m**
2. 2,000 × 5 = **10,000 mL**
3. 3,000 × 4 = **12,000 g**

◆ BRAIN BENDER · THE FUEL GAUGE

- 6 L = 6,000 mL
- 750 × 7 = 5,250 mL used
- 6,000 – 5,250 = **750 mL left**

Mixed units + multiply + subtract.

The rover traveled **1.5 km**, then **2.3 km** more. How far did it travel in all?

Answer: ____________

One beaker holds **0.75 L**. Another holds **0.50 L**. How much **more** does the first hold?

Answer: ____________

◆ BONUS OBJECTIVE · BRAIN BENDER

The Sample Weights

A rock sample weighs **0.6 kg**. Mission Control collects **3** of them. What is the total weight? Then, how much **more** is needed to reach **2 kg**?

Optional — skip it on a tired day. Clearing it earns the ◆ Sharp Shooter mark.

DEBRIEF

MISSION 07 · ANSWER KEY

Mission Debrief

For Mission Control (the grown-up) — or for Charles to self-check once a page is done.

A · WARM-UP DRILLS

1. **9,790**
2. **7,307**
3. **5,714**
4. **6,992**
5. **564**
6. **3,655**

Facts: 7) 56   8) 49   9) 18   10) 9   11) 6   12) 5

B · DECIMALS

1. 0.7
2. $\frac{45}{100}$
3. 0.03
4. 0.6 > 0.45
5. 0.30 = 0.3
6. 0.9

C · DECIMAL READINGS

1. 0.2 × 4 = **0.8 cm**
2. 1.5 + 2.3 = **3.8 km**
3. 0.75 – 0.50 = **0.25 L**

◆ BRAIN BENDER · THE SAMPLE WEIGHTS

- 0.6 × 3 = **1.8 kg** total
- 2.0 – 1.8 = **0.2 kg** more needed

Multiply decimals, then subtract.

Everything You've Cleared

CLEARED? ▢

MISSION BRIEF

This is the **Final Expedition**. One problem from every mission this summer. You've done every one of these before — this is your victory lap.

Rounding: Round **6,748** to the nearest **hundred**.

______

Units: **5 km** = **?** m

______ m

Multiply: **124 × 3** =

______

Divide: **99 ÷ 8** =

______

Fractions: $\frac{2}{5} + \frac{1}{5} =$

______

Decimals: Compare <, >, or =: **0.7** _____ **0.65**

MISSION 08 · C

FIELD OBJECTIVES · WORD PROBLEMS

The Last Push

CLEARED?

Real missions, real numbers. **Show your work** in the box — how you got there matters more than the answer.

The crew packs **6** crates with **125** items each, then gives away **248** items. **About** how many are left? Round to the nearest **hundred**.

Answer: ____________

A **4 L** tank is split equally into **8** bottles. How many **mL** go in each bottle?

Answer: ____________

The trail is **2.5 km** long. The crew walks the whole thing **3** times. How many km is that?

Answer: ____________

◆ BONUS OBJECTIVE · BRAIN BENDER

Final Expedition: The Storm

The base has **1,000** supply units. It sends out **6** teams, each taking **84** units. Then a storm destroys **one quarter** of what's **left**. How many supply units remain?

Optional — skip it on a tired day. Clearing it earns the ◆ Sharp Shooter mark.

DEBRIEF

MISSION 08 · ANSWER KEY

Mission Debrief

For Mission Control (the grown-up) — or for Charles to self-check once a page is done.

A · WARM-UP DRILLS

1. **2,494**
2. **1,238**
3. **397**
4. **6,491**
5. **867**
6. **3,204**

Facts: 7) 16 8) 42 9) 18 10) 5 11) 5 12) 9

B · EVERYTHING YOU'VE CLEARED

1. 6,700
2. 5,000 m
3. 372
4. 12 R3
5. $\frac{3}{5}$
6. 0.7 > 0.65

C · THE LAST PUSH

1. 6 × 125 = 750; 750 − 248 = 502 → **500 items**
2. 4 L = 4,000 mL; 4,000 ÷ 8 = **500 mL each**
3. 2.5 × 3 = **7.5 km**

◆ BRAIN BENDER · FINAL EXPEDITION: THE STORM

- 6 × 84 = 504 units sent out
- 1,000 − 504 = 496 units left
- ¼ of 496 = 124 destroyed
- 496 − 124 = **372 units remain**

The capstone — multiply, subtract, and a fraction of a whole, all in one.

EXPEDITION COMPLETE

Mission Accomplished

Commander Charles cleared all eight missions of the Summer Expedition. Every objective, every trail, and more than a few Brain Benders.

GRADE 4 CLEARED
